

WHAT IS CLAIMED IS:

- 1. A double cup comprising a main cup and an auxiliary cup, wherein said auxiliary cup has a shape which is the same as that of said main cup, and wherein said auxiliary cup has a recess formed at an outer periphery of a lower surface of said auxiliary cup, said auxiliary cup being coupled to an upper portion of said main cup through said recess, wherein said auxiliary cup has a hole with a protrusion extending to a predetermined height and formed at a lower surface of said auxiliary cup.- -
2. The double cup of claim 1 wherein the periphery of the upper surface of said main cup comprises a rounded portion having a top and wherein said recess in said lower surface of said auxiliary cup extends only so far as the top of said rounded portion.
3. The double cup of claim 2 wherein said rounded portion has a part which extends outwardly from said cup outwards of said top of said rounded portion, wherein there is no part of said auxiliary cup which overlies said part.

4. The double cup of claim 2 wherein said double cup consists only of two pieces, said two pieces being said main cup and said auxiliary cup.

5 The double cup of claim 3 wherein said double cup consists only of two pieces, said two pieces being said main cup and said auxiliary cup.
